

New and exclusive at interWays: Mobile Tasks Sync for your mobile device!

Just set up tasks sync on your device (if not already working) exactly like mail/calendar/contacts sync as exchange account.

The iPhone/iPad now't have a tasks app out of the box.

For iPhone/iPad, you can, as an alternative, install an additional tasks app. We have successfully tested the 'Moxier Tasks' and 'Aderium Companion' apps, available via the AppStore directly on your iPhone/iPad.

Setup:

- Enter user name (interWaysMAIL email address) and password (click accept on the certificate prompt with Moxier)
- Server: ssl.interways.de
