You should change your assigned login password as soon as possible. Changing your password frequently improves the security of your mailbox.

Please open interWaysMAIL Webmail (https://ssl.interways.de) and click on "Preferences" (Options).

In the "Login Options" section, please click in "Change password".

IMPORTANT: Please **change your password IMMEDIATELY** in your **mobile device** (iPhone, etc...) and in
ALL applications you use
(Outlook, Apple Mail, iSync Connector, Desktop Application, Thunderbird, etc...). If you don't change the password in alle devices and applications, they will continue to use the old password for login; subsequently, your
account will be locked
for one hour
after 5 wrong password entries
!
