

We have a new interWays connector for use with Outlook and Windows 8. It can be found in our Downloads section.

We recommend using Outlook (2003, 2007, 2010 or 2013), since it offers better and more functionality than the Windows 8 integrated clients.

To set up the integrated Windows 8 mail, contacts and calendars client:

Open Mail App

Create new account

Account type: Exchange ActiveSync EAS

Click on "Show more options"

Enter server address: ssl.interways.de

Domain: leave empty

Username: your interWaysMAIL Email address

Password: your interWaysMAIL password
