Apple Mail setup：   **compatible with Snow Leopard!**

   -   **Apple Mail**: Please set up the account as new POP3 or IMAP or Account, for settings see: Support-->   Server Settings (Mail-->Settings-->Accounts: '+' to add new account)
   -   If you use Apple Mail in the IMAP mode, then you should adjust these settings: Go to the account settings (Mail-->Settings-->Accounts) of the interWays account, go to "Mailbox Behaviour" and activatethe options "Mave deleted mails to trash" and "Save deleted mails on server".
   -   If you want to sync your Sent folder as well, simply mark the 'Sent' folder in the interWaysMAIL section of the mailbox list, then click on Mailboxes (top row) --> use this mailbox for --> Sent Emails. Same procedure for deleted mails: Mark "Trash" in theinterWays folder section --> click on Mailboxes --> use this mailbox for -->Trash.

   -   Desktop Aplication: Download and install according to instructions: Support--> Downloads

   -   Thunderbird: Please set up the account as new POP3 or IMAP Account, for settings see: Support-->   Server Settings

IMPORTANT: Please back up your data regularly. Just follow the instructions for backups in the support section! You are responsible for your own data, interWays can not be held liable for loss of data, service interruptions and/or damages thereof.
