

Now new: Display other users' **shared Calendars on your iPhone, iPad, Android phone or Windows Phone and Mobile device** !

Beginning with **iPhone OS 3.0**, everything you need is already on your phone!

For Windows Mobile devices you need e.g. Sianix Calendar Sync (www.sianix.com)

Android users please install this app from the Android Market: CalDAV-Sync for Android.

Setup:

- The user sharing his/her calendar must activate sharing for the calendar and set your interWaysMAIL email address as allowed user, [see instructions here](#) (Support area-->Share calendars, folders, ...)!

- Add new account (iPhone OS 3: Settings-->Mail, Contacts, Calendars-->Add Account-->Other-->CalDAV)
 - choose CalDAV Server Calendar
 - Description: type a name
 - Server: ssl.interways.de
 - User: Your **own** interWaysMAIL email address
 - Password: your password
 - Continue
 - "Cancel" the SSL warning message
 - Go to "Advanced Settings" tab
 - Change Port to 443
 - Finish
 - Now you can choose all calendars (even shared ones) in the calendar application.
